To, The Recruitment Manager
EY Consulting

Respected Sir/Ma'am,

I am writing to apply for the Technology Risk - Intern Programme advertised on the EY Consulting job portal. I think my skills, as outlined in my resume, make me an ideal candidate for this program.

I am a quality-oriented undergraduate student (B. Tech in Computer Science and Engineering) currently attending Amity University. Throughout my academic career, I have been constantly praised as diligent by my professors and peers. While working on academic and extracurricular projects, I have developed proven analytical, technical and critical thinking skills, which I hope to leverage into the said internship programme at your company.

Online certifications, MOOCs and academic coursework have laid the foundations of my career. I have had experience working in R, Swift and Python through these channels of knowledge, and extracted them in various FinTech projects at several hackathon and idea competitions around the globe. I am proficient in Machine Learning, Financial Modelling, Blockchain Development and passionate about deriving insights from data.

I've had the privilege of working as a Data Analyst Intern at various companies, and being selected as one of the ten AI engineers by Technical University of Munich and UnternehmerTUM for Digital Product School in their upcoming batch. In my past experiences, I've constantly worked towards extracting human-centric insights from data, and I'm looking forward to doing the same in my future endeavours.

Another facet of my professional personality that I'd like to highlight is my networking and people skills. I am proud of my ability to effectively interface with my colleagues.

This program would be a vital addition in my learning umbrella, providing me with industry experience. Thank you for your consideration and I look forward to hearing from you soon.

Sincerely,

Utkarsh Sharma
